REDUCING ACCIDENTS IN THE HOME - EFFECTIVE INTERVENTIONS

Every year in Wales, around 15,000 children under the age of 5 attend Emergency Departments as the result of an accident at home. These accidents often result in serious and disabling injuries and importantly, the majority of them are preventable.

This one-day course draws on research and evidence based interventions to help practitioners understand and address this issue.

Aims of training

This participative course will focus on the most common and/or most serious or disabling accidents and methods of intervention.

The course content will include:

- Identification of who is most at risk
- Why risk varies
- Effective Intervention – Falls, Fire, Poisoning, Burns and Scalds
- Interventions in practice

At the end of the course, practitioners will have the skills and knowledge to identify who is most at risk and which interventions are effective in reducing home accident for the under 5s.

Target Audience

Everybody has a role to play in reducing the numbers of children who are injured through home accidents and this course will be of benefit to:

Children and Young Peoples Framework Partnerships, Midwives and Health Visitors, Community Safety Partnerships, Flying Start and Sure Start, Social Services, Home Safety Equipment Scheme Providers, Health and Well Being Managers.
